

GRACE HEPAMAX

The air cleaner, type Grace HepaMax extracts ultra fine particles, such as combustion and secondary (in-)organic aerosols that enter the human bloodstream. This specific air cleaner with HEPA-14 filter is highly suitable for small spaces that have to meet high expectations regarding indoor air quality.

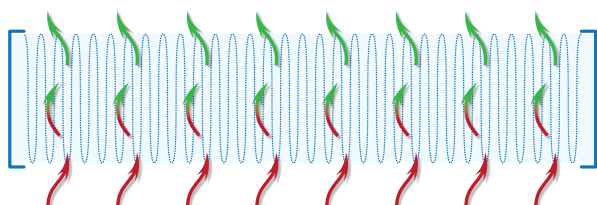

FILTERING PRINCIPLE

The Grace HepaMax contains a unique filter system, which cleans indoor air in three phases.

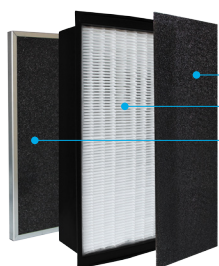

Phase 1: the pre filter captures the bigger particles of dust and other polluting items such as hairs and skin flakes.

Phase 2: the environmentally-friendly HepaMax filter has a large surface area. Resulting in low air resistance and a high filtering capacity. It filters at 99.995% of most penetrating particle size (MPPS).

The HepaMax filter in operation:

Phase 3: finally the integrated activated carbon filter adsorbs unpleasant odours and gases.

- Filter construction:
- Pre-filter
 - HepaMax filter (incl. activated carbon)
 - Carbon Filter Plus (optional)

DIMENSIONS
